

Presence Risk Index.

*Where digital authority
separates from physical reality.*

PUBLISHED EVIDENCE SNAPSHOT

86

CURRENT PRESENCE
RISK POSITION

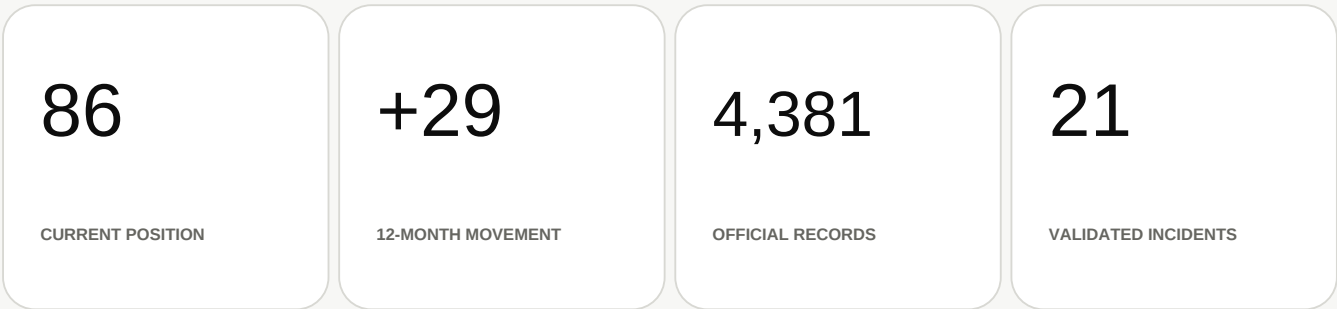

EVIDENCE WINDOW

1 August 2025–31 July 2026

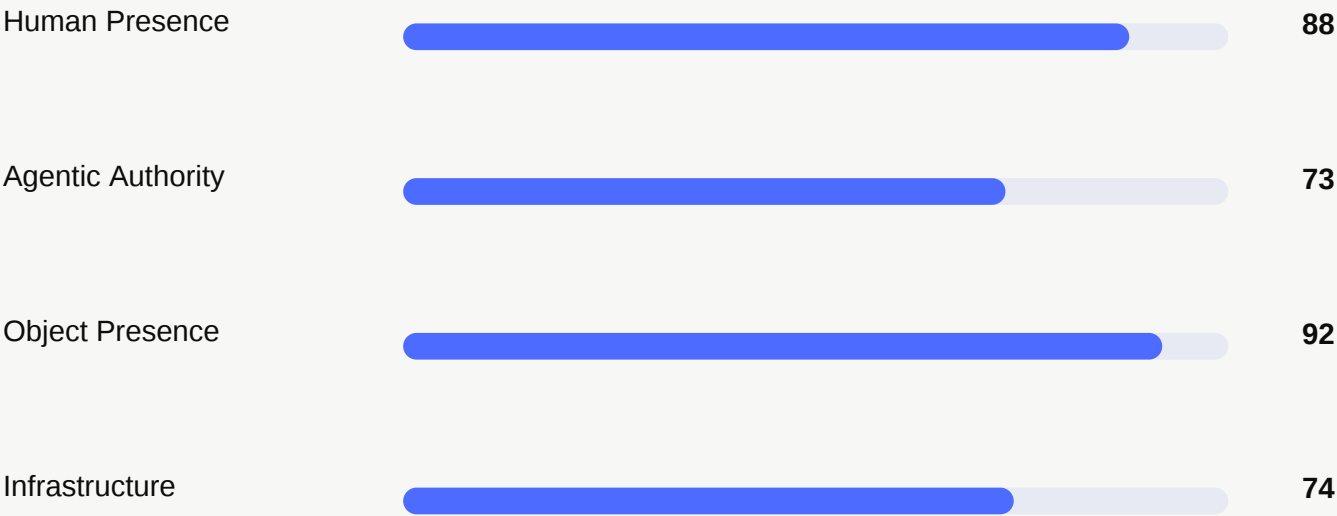

VERSION

Evidence Assurance 1.0 / 2026-Q3

Evidence-weighted pressure *at the claim-reality boundary.*

PRESENCE DOMAINS

CURRENT EXPOSURE

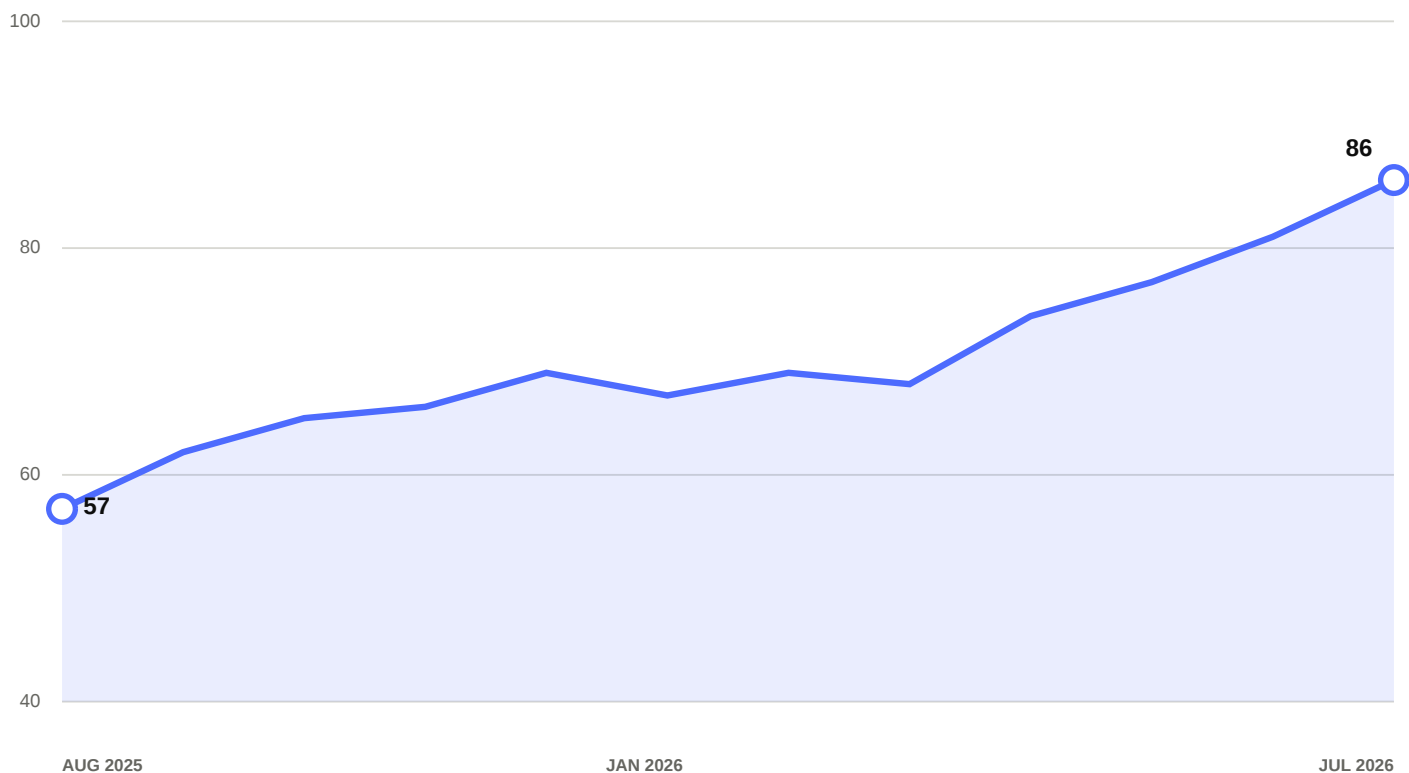

Object Presence

Pressure is highest where a listing, label or record can be accepted while the identity, condition or custody of the physical object remains unresolved.

The position is directional. It is not an incident probability, prevalence estimate, loss forecast or compliance rating.

Twelve months of *Presence pressure.*

The index moved from 57 to 86 across the published evidence window. Movement combines evidence density, authority depth, consequence and verification difficulty.

HOW TO READ THE LINE

Signal

Selected records and direct institutional sources move the evidence base.

Weight

Consequence, authority depth, exposure and verification difficulty shape the position.

Boundary

Unequal domain coverage prevents direct prevalence comparison across domains.

Signals with the highest *current editorial score.*

Each signal remains traceable to a direct or accountable source. The event score is an editorial indicator - not a probability.

01 / OBJECT PRESENCE & AUTHENTICITY

Vive Health Recalls Adult Portable Bed Rails Due to Risk of Serious Injury or Death from Entrapment and Asphyxiation; Two Deaths Reported

U.S. Consumer Product Safety Commission / 26 March 2026

ASSURANCE A

96

02 / OBJECT PRESENCE & AUTHENTICITY

False CE markings put unassessed feeding devices into neonatal care

UK Medicines and Healthcare products Regulatory Agency / 01 July 2026

ASSURANCE A

95

03 / HUMAN PRESENCE & AUTHORITY

False worker identities placed overseas operators inside more than 100 companies

U.S. Department of Justice / 15 April 2026

ASSURANCE A

93

04 / AGENTIC AUTHORITY

AI performed most operational work in a documented espionage campaign

Anthropic / 15 September 2025

ASSURANCE B

92

05 / INFRASTRUCTURE PRESENCE & ACCESS

Known-exploited authentication flaw could issue full administrative authority

U.S. Cybersecurity and Infrastructure Security Agency / 22 July 2026

ASSURANCE A

91

From public evidence *to a bounded position.*

01

Claim

What appeared valid?

02

Authority

What could it cause?

03

Presence

What physical boundary was missing?

EVIDENCE ASSURANCE

A

4,388 RECORDS

Direct public authority or regulator record.

B

14 RECORDS

Primary or accountable first-party publication.

THE INDEX DOES NOT CLAIM

- incident probability or predicted loss
- equal record coverage across domains
- independent forensic verification of every event
- a compliance, security or institutional performance rating

Digital validity is not *physical authority.*

Presence Risk is the exposure created when a consequential system accepts a valid-looking digital claim without establishing the expected person, object or accountable principal behind it.

OPERATING SEQUENCE

01

Observe

Establish physical context.

02

Decide

Apply an explicit rule.

03

Act

Permit, deny, record or escalate.

FROM EVIDENCE TO CONTROL

Bring us one authority workflow.

If a digital claim can move money, grant access or trigger a consequential action, 4SI wants to map the boundary with you.
